

National Computer Board

LET'S START THINKING GREEN

FOLLOW THE GREENER STEPS

- When making buying decisions - look for energy efficient devices
- Monitor power consumption and look for ways to reduce it
- Turn off equipment when it is not being used
- Use video conferencing to save time and energy
- Ask yourself if you really need to print that document
- Reuse and repair equipment before replacing
- Safe disposal and recycling of equipment
- Maximise use of e-services
- Use Desktop/Server/Storage Virtualization technology
- Pass on the green message.....

And did you know

2% of global carbon emissions come from the manufacture and use of ICT

SAVE

your planet
your energy
your money

Go Green

Green ICT...
